

Season 1 Episode 16

The Red Moon Monks

Multisword is hurtling through space in the Ultraverse and he smashes into a giant red planetoid that resembles the moon but it is red. Multisword's urn gets cracked and he gets up. Multisword looks around and he said, "Where is this place? I don't think I know this celestial body." Multisword hops and he comes across a village made from ancient temples and they are populated by wrinkly white skinned people. Multisword heads into the town and thugs surround him. The leader of the thugs said, "Look at this. It is not everyday a piece of treasure walks towards you." Multisword said, "Don't cross me or you will get a new definition of backfiring." The leader thug said, "Ooooooh, I am really scared. It is like an urn is going to beat me up or something." The thug smacks Multisword and the thugs gang on him. A group of black and red robed monks show up and they fight off the thugs. The thugs fight back. The thugs use bizarre experimental guns and they blast the monks and they fall down stunned. The monks drop their swords and four swords from four of the monks is in range of Multisword. Multisword grabs the four swords and he rapidly fights off the thugs. The thugs run for a truck with a large transport section and they drive away. Multisword darts himself and he sticks to the back of the truck. Multisword takes out his swords and he cuts a hole in the back and he jumps to the front of the storage area and he uses his swords to separate the main cab of the truck from the storage portion. The storage portion falls into the street and breaks and reveals tons of gold and jewels. The lead banker in the town finds the treasure and he said, "It is the stolen treasure. The thieves stole this from the highest secure bank. I didn't think anyone could possibly recover it. Whoever you are, you are a hero." Multisword takes the center stage and the black and red robed monks find Multisword. One of the monks said, "Multisword, I presume." Multisword said, "You know me?" The monk said, "I heard you are the fearsome Multisword and we need your help."

The red and black robed monks show Multisword around the monastery. One of the monks said, "We are the Red Moon Monks. We are the defenders of the Red Moon and all it stands for." Multisword said, "I don't think I ever heard of this, Red Moon before." The other monk said, "It was fully protected and supported by the Ultraverse government but the Ultraverse government cut us off from help and support and left us helpless. The Ultraverse even sent its monks to come and bring what they called, 'order' to us. They killed our monk master and they continued bullying our people until they finally gave up and left us in the dark. We heard that you, Multisword are a brave and fearsome fighter and we need someone like you to rule over us. We can finally get revenge on those Ultraverse people that screwed us over and we can show the Ultraverse that we deserve to rule over it." Multisword said, "I will make an awesome ruler to you."

In the capitol building of the Ultraverse, the government is in chaos. People are physically fighting each other over new taxes and laws. The prime leader of the Ultraverse stands and the front and yells, "ORDER!" Everyone watches him. The prime leader said, "I know most of you are against our new taxation laws that require our citizens to be on their feet all the time watching their bank bills for unexpected expenses but I think it is worth it. I also think we should cut all funding to the monks and have them funded by our people instead. It would really help balance our declining budget." Someone yells, "We must have

another election!" The prime leader said, "I am not due for another election for two more years and I think we can go with what we have until then." An agent in the capitol said, "You really must consider an election. Our crime rates are at all time highs and people are saying you are doing nothing about it." The prime leader said, "It is not that I don't want to do anything about it. It is just there are so many things we must take care of and we cannot accommodate for every little crime in the Ultraverse. That's why we have the monks." The agent said, "You just said we are cutting funding to the monks and citizens should pay for them but the citizens don't have as much money thanks to your policies and they are not willing to give up anything more." A window breaks in the government office and Red Moon Monks jump in. The prime leader's guards are dispatched and the Red Moon Monks fight off the guards. More guards show up and Multisword enters and slashes down the remaining guards. Multisword aims his swords at the prime leader. Multisword said, "Remember me? You may think this Ultraverse government is the best it can possibly be but it is not. I have the best way of life imaginable. I have an army that is growing at every second."

The Ultraverse Monks barge in through the door and they arm their swords. Keith, Ivan, Roswell, and an army of Ultraverse Monks are present. Keith said, "Stand down, Multisword." Multisword said, "Mr. Keith. Long time no see. I am glad to meet you again my old friend." Keith said, "Cut it! We know you are up to something and we are not going to let you have control of every universe in this vast Ultraverse." Multisword said, "But you don't know what I have and maybe it is better than anything you monks can think of." Ivan said, "Can't we just fight him out of here or something?" Multisword said, "That is a very good idea. Ivan comes up with better ideas than you. He should be running the monks." Multisword sends his monks after the monks and it becomes a fully fledged battle between the different types of monks. Keith slashes his sword with Multisword's four swords. Keith and Multisword fight and Keith slowly lures Multisword outside of the capitol building. Keith and Multisword are fighting outside. A monk fighter locks in on Multisword and is fires an electrically charged net at Multisword. Multisword sees the net coming for him and he grabs Keith and pushes him into the net and Multisword jumps to the fighter and he uses his swords and cuts out the monk pilot and Multisword jumps in the fighter and flies away in it. Keith is in the net and he is twitching in pain. Keith said, "Dang! Multisword got away again. I hope those tracking devices I recently installed in those fighters still work."

Ivan and monks fight off the Red Moon Monks. Ivan slashes one of them and he slashes the monk again in the head. The Red Moon Monk falls to the floor incapacitated. The other monks incapacitate the Red Moon Monks. Keith breaks free from the net and he enters the capitol building. Keith said, "Is everyone alright?" The prime leader looks angry and he gives Keith and Ivan dirty looks. The prime leader said, "Keith! I don't like you making a mess of my capitol. Multisword got away again and now the capitol is a mess." Ivan said, "Don't get ticked at Keith. It wasn't his fault that Multisword attacked you and almost killed you. If anything, you should be thankful for Keith that you are still alive and everything is mostly in tact." The prime leader said, "If you pull another fail like this, I am going to fully cut your funding and you will have to get alternate jobs."

The incapacitated Red Moon Monks lie on beds in labs in the monk dojo. Augi and Keith look over the Red Moon Monks. Augi said, "It looks like Multisword may have finally brought us to match point. That is if you are wrong about the tracking device in the fighters." Keith sits at a computer and he looks at the coordinates of the fighter that Multisword stole. Keith said, "It looks like Multisword has taken the fighter and he brought it to a faraway place

in an uncharted sector of Ultraverse space. It is most likely a celestial body of some sort. Augi said, "That could be the place where the Red Moon Monks are from." Keith said, "I will assemble an assault force as usual and we will attack the Red Moon and..." Augi said, "As your grand master, I have a better idea in mind." Keith said, "What idea could be better than bringing the war to them?" Augi shows Keith a surgical table and it is surrounded with surgical serums. Augi said, "This is experimental new technology that is used to change someone's physical appearance so they look completely different and they could pass for someone else. We would need a sample of the DNA from the person we are going to emulate. I say we use the DNA of one of the Red Moon Monks. You will be able to emulate their physical appearance and you can go to the coordinates Multisword went to and you can infiltrate their monastery and find out what their deal is. You will come back to me and report what you find." Keith said, "That sounds like an unusual but interesting plan. I may need backup though. I think I should get Ivan in a monk transport to patrol the nearby space and I will..." Augi said, "Ivan must not know about this. None of the other monks other than us shall know about this. Don't even tell Roswell. However, I do have plans for Ivan and his friends in this but they must not know. We will use a computer generated duplicate of you in the transport. It is so real that Ivan and his friends won't notice the difference. Remember, the Ultraverse is counting on you." Keith said, "I guess I have no other choice." Keith lies on the lab bench and serums are injected into him and his face and body is sculpted into the physical appearance of one of the Red Moon Monks. Keith is in his new appearance and he looks at himself in a mirror. Augi is there and he said, "You see. I cannot tell it is you, Keith. Now let me give you some insight based on data I found. Your name is Igove Delnore and you have been a Red Moon Monk your whole life. Your monk comrades are essentially your brothers. Now, go out there."

Keith shows up at the Red Moon. Keith walks around the red dusty surface and he finds the monastery. Keith goes to the front door and opens it and enters. Keith walks down the long and eery hall. There are paintings of famous Red Moon Monks. There is a new large painting of Multisword looking down at the main foyer. Multisword is with some of the Red Moon Monks. Multisword said, "Ah, Igove. I am glad you are back. I thought they had you." Igove said, "I broke free of them. I caught a ride with some smugglers and they brought me back." Multisword said, "It is good to have you back ol' chum." Keith joins the other monks and they gather in the briefing room. Multisword is at the front of the briefing room and he said, "Our attack on the capitol was really just to incite fear and panic into the people of the Ultraverse. The real attack is going to be at the Ultraverse telescope. It is a large telescope in the center of the Ultraverse. At the telescope, you can get a precise pinpoint view of almost any detail in the known Ultraverse. Once we take over the telescope, we will pretty much rule over the entire Ultraverse and if anyone goes against us, we will just have them melted using the heat ray we will install in the telescope."

The Red Moon Monks are brought to the telescope and they begin construction on the heat ray and they wire up the computers and equipment. Multisword said, "Igove, you will be in charged of our data analysis and inputting." Keith is given a long list of places and the coordinates of places that are going to get hit. Places listed are, Bank Central, Monk Dojo, Ultraverse Capitol, and Red Moon. Keith's eyes go big and he said, "He's going to destroy the Red Moon." Keith locks himself in the computer control room and he goes to the input commands machine. Keith scans the room for cameras and anything that could be spying on him. Keith finds nothing and he gets to the computer. Keith takes out a Monk communicator and he sends a signal with it. The signal goes to a CGI Keith that is sitting in the main control

seat of a monk transport with Ivan, Safron, and Dirk. Dirk is playing with a yo-yo and he said, "Why would Augi give us such an objective. There is nothing to do. It has been several hours and nothing has come remotely close to us." Keith said, "I agree but orders are orders. Augi ordered us to stay here and watch for potential threats so we shall do just that." Safron said, "I love this task. I get to sit here and chat with Ivan for hours on end. This is the best task I was ever given." Keith flinches and he said, "There is a telescope at the center of the Ultraverse and it is going to wipe out all the important establishments and services in the Ultraverse." Ivan said, "How did you know that?" Keith said, "Don't ask. I just know." Keith controls the transport and he leads it to the telescope.

Keith barges out into the room the heat ray is in and all the Red Moon Monks and Multisword are present. Keith said, "Multisword betrayed us!" Everyone stares at Keith. Keith shows them the list of places and their coordinates to be destroyed. One of the Red Moon Monks looks at the list and he said, "Yeah. Multisword double crossed us." There is still a group of Red Moon Monks standing around Multisword. One of those monks said, "Multisword has given us a lot. I say it is worth sacrificing our old home so we can have millions more better homes under Multisword's rule." The other monk said, "You must be out of your fucking mind. We cannot abandon the Red Moon which we swore to protect." They look at Keith and the monk standing next to Multisword said, "C'mon brother. We must ditch our moon so we can be off to new and better moons." Igove said, "I hate to disagree with you, brother. It is ethical and intellectual to flock the coupe at some point but to let it suffer and go to waste, that is something I will not condone." Igove's brother said, "Since when did you grow a brain? You were never that smart. You never talked sense. I knew you since I was born and you always blindly went with anything I said. Something tells me that you are not my brother. You are an impostor." One of the monks standing next to Keith said, "He finally came to his senses because it is the right thing to not have the Red Moon destroyed." The legions of Red Moon Monks draw out their swords and they clash into battle.

The Ultraverse Monk transport lands nearby the building the telescope is at. Ivan, Safron, and Dirk are ready to leave and Keith said, "I must stay in the transport so we can leave quickly. My instincts tell me this place may blow up and we may leave in a rush." Ivan said, "No, Keith. You must come with us." Keith said, "I have my orders to stay in the transport." Safron said, "You are one of our greatest fighters. We cannot afford to leave you behind." Safron tries to grab onto Keith's hand and her hands phase through Keith's hands and body. Safron waves her arms through Keith. Safron said, "Keith is a hologram." Ivan said, "What the? This is not the real Keith?" Dirk said, "I knew it. We've been played. This is some kind of a prank." Ivan said, "There is only one thing we can do now. Let's pay this telescope a visit and spare this Ultraverse."

Ivan, Dirk, and Safron, use a harpoon gun and they cling onto the top of the telescope. They climb the harpoon cable and they end up on the top lens of the telescope. Ivan takes out his sword and he tries to cut a hole in the lens but it does nothing. Safron said, "How are we going to get in?" Dirk jumps and ground pounds onto the lens and he makes it slightly crack. Dirk smashes the lens with his fists and the lens cracks and breaks and Ivan, Dirk, and Safron fall into the telescope. They fall into the focal point section. Dirk is about to smash the focal point and Ivan stops him. Ivan said, "I have a better idea." Ivan inverts the focal point. Ivan, Dirk, Safron, continue to slide down the telescope and they find an opening and they fall out of the opening and into the battle. They see the Red Moon Monks fighting each other. Ivan said, "Did we miss something?" Safron said, "Why would Red Moon Monks fight each

other?" They see they are about to get caught in the crossfire of the Red Moon Monks when one of the Red Moon Monks pushes them aside to safety and he fights off some of the Red Moon Monks. Ivan said, "Thanks for saving us. Are you a defector or something?" Igove said, "The Ultraverse is in serious danger and I have come here to spare the Ultraverse. The lead fire button is over there but it is being guarded by Multisword." Ivan said, "Multisword is interested in me. We will go there and get him away from that fire button."

Ivan, Dirk, and Safron confront Multisword. Multisword said, "Ivan. You keep finding me." Ivan draws his sword and he starts dueling Multisword. Safron and Dirk stand on the side and Ivan duels Multisword. Multisword locks all four of his swords on Ivan's sword. Multisword said, "I can stay like this for all eternity." Ivan said, "Good." Dirk grabs onto Multisword and he duct tapes him to one of Safron's skateboards. Dirk sends Multisword into a wall. Igove gets to the controls and he views camera footage of the focal point. Igove sees that the focal point has been inverted. Igove presses the button and everyone at the telescope stops and watches the heat ray charge up. Igove looks at Ivan, Dirk, and Safron, and he said, "We must get out of here now." Igove, Ivan, Dirk, and Safron escape the telescope and they run outside. The heat ray comes down on the telescope destroying the telescope as well as the entire celestial rock it is on. Igove heads directly for the transport and he enters the transport with Ivan, Dirk, and Safron. They take off. Ivan said, "Say, how did you know our transport was parked in this exact spot?" Igove said, "I made it do that. I also had control of that holographic version of myself at the controls." Safron said, "You are Keith?" Keith said, "I am." Ivan said, "I never would have guessed that you were Keith." Keith said, "I used some experimental new serums and technology to sculpt myself into the same physical form of one of those Red Moon Monks that attacked the capitol. They had a plan to melt the Ultraverse and it was turned on them. It also looks like the Red Moon Monks have broken out into a civil war with themselves. We have saved the Ultraverse. I say it is time we go home."

Multisword is hurtling through space and he is collected by a large junk freighter. The junk freighter is controlled by Red Moon Monks. Multisword is placed at the main control center where the Red Moon Monks gather around Multisword. Multisword said, "So, are you with me or are you against me?" One of the Monks said, "We are with you. Screw the Red Moon. We don't need it. We will call ourselves something else. We will be, the Red Star Monks. We will defeat those foolish Red Moon Monks and we will be the true rulers of the Ultraverse."
